Scrimba

PROFILE SUMMARY

Creative and results-driven Software Engineer with a strong foundation in modern web technologies and a passion for building seamless, high-performance user experiences. Currently delivering real-world impact on a government platform for the Ghana Education Service (GES-Ho), with recent experience building production web applications end-to-end. Skilled in React, Next.js, Tailwind CSS, Node.js, Supabase, and Firebase, with a proven ability to turn complex requirements into clean, responsive interfaces — complemented by a working knowledge of graphic design.

EXPERIENCE

Software Engineer — Contract Project (lafyai.com) *Remote*

- Built and maintained a web application using Next.js, Tailwind CSS, Node.js, and Supabase for the backend and data layer.
- Implemented authentication, database schemas, and API integrations with Supabase.
- Ensured pixel-perfect, responsive design across all screen sizes and devices.

React Developer — GES-Ho (Ghana Education Service)

Ongoing • Ho, Ghana (Government Project)

- Building a React-based platform for the Ghana Education Service regional office in Ho.
- Implementing dynamic UI components, routing with React Router, and data management with Firebase.
- Collaborating directly with government stakeholders to meet project specifications.

Freelance Software Engineer *January 2024 – Present • Remote*

- Developed responsive websites and landing pages for small businesses using React, Node.js, Supabase, and Tailwind CSS.
- Delivered full-cycle solutions from design to deployment on platforms like Netlify.
- Provided graphic design support alongside development for select client projects.

FEATURED PROJECTS

Personal Portfolio Website

Built with React + Vite, featuring project showcases, smooth animations, and a responsive layout. Deployed live at mycollinsportfolio.netlify.app.

Task Management Application

Dynamic task manager built with JavaScript and Firebase for real-time data sync and authentication.

Car Rental Website

Full React SPA with browsable car listings, booking flow, and mobile-first responsive design.

Voting Management System — HTU Project

Web-based voting platform built with PHP and MySQL to streamline SRC elections at Ho Technical University.

EDUCATION

B.Sc. Information Technology — Ho Technical University

2025 – 2027 (Expected) • Ho, Ghana

HND Information Technology — Ho Technical University

Completed 2025 • Ho, Ghana
